

DEVOPS ENGINEER (M/W/D)

The Future of Finance – today.

Finmatics is a fast growing software as a service (SaaS) company that provides artificial intelligence (AI) solutions to thousands of businesses of all sizes. Our mission is to automate financial & accounting processes in order to eliminate unnecessary manual tasks.

As a **DEVops Engineer** your work will be a critical part of accomplishing this mission.

Your Tasks

- Design, build, and operate core infrastructure used by all of Finmatic´s engineering teams
- Uphold our high engineering standards and bring consistency to the many codebases and processes you will encounter
- Improve engineering standards, tooling, and processes
- Take a lead role and help tracking challenging Data Science & AI / Machine Learning Ops
- Define, automate, maintain, and monitor build, delivery, and deployment processes using CI/CD
- Work jointly with Data Scientists and Data Engineers towards designing and setting up DataOps and MLOps practices
- Stay on top of latest technology developments and continuously contribute to the transfer of DevOps engineering best practices

We´re looking for someone who has:

- Software engineering experience in a high-stakes production environment
- A knack for considering how systems can fail and how to fix them
- Empathy, strong communication skills and a deep respect for the power of collaboration
- High standards for code quality and a constructive attitude to help others raise the bar

- Strong background in software engineering and scripting, preferably in Python
- Experience with DI/CD concepts and tools (e.g. GitLab, Jenkins, Ansible). Very good understanding of operating systems (Unix/Linux, and containerization (Docker, Kubernetes)
- Pro-active, solution-driven, and open-minded team player with a hands-on mentality and an agile mindset
- Experience with Data Science or Machine Learning Operations (ML-Ops) is beneficial

What we offer

Be part of shaping the future of financial workflows using the latest technical possibilities.

- Pleasant working atmosphere in the middle of Vienna
- Possibility to work from home by arrangement
- Open and honest corporate culture
- Independent work and short decision-making paths
- Young, dynamic team and flat hierarchies
- Full refrigerator with cool drinks and fruit
- Flexible working hours
- Job ticket for Wiener Linien
- The minimum salary for this position is € 55,000, overpayment possible depending on qualifications

INTERESTED?

Send us your CV and, if you have anything else to tell us, to jobs@finmatics.com. A separate letter of motivation is not a must. We are looking forward to your application!
